KRASNOYARSK REGION | YENISEY SIBERIA
KRASNOYARSK REGION KHAKASSIA TYVA

YENISEY SIBERIA DEVELOPMENT CORPORATION

Digital version

MIKHAIL KOTYUKOV

Governor of Krasnoyarsk Region

Investor interest in the Krasnoyarsk Region is constantly growing. From 2022 to 2025, the increase in fixed capital investments amounted to 88.9%. According to the results of 2025, this indicator is estimated at 1.4 trillion rubles, which is a quarter more than a year earlier.

To sustain this positive dynamics, our region has undertaken the necessary support measures aimed at continuing production modernization, creating new jobs, and increasing the revenue of municipal budgets. Ultimately, these actions have a beneficial impact on the population's overall quality of life.

The Yenisey Siberia Development Corporation is a specialized entity responsible for attracting investors to the area. It oversees more than 300 projects across various sectors, stimulating the local economy and fostering its growth.

The Corporation's positive experience gives us confidence that additional growth areas for business activities will emerge in the region.

VLADISLAV KHOVALYG

Head of the Republic of Tyva

The Republic of Tyva is a region with significant investment potential, attracting increasing attention from businesses and investors every year. In 2025, investments in the republic amounted to more than 30 billion rubles, indicating growing confidence in our territory.

Today, almost a quarter of all investments in Tuva come from private capital. The government of the republic, together with the Yenisey Siberia Development Corporation, is actively working to create comfortable conditions for entrepreneurship and strengthen trust from the business community.

Of particular importance for the region’s economic development is the launch of two major projects for the development of rare earth metals and a copper-porphyry deposit, which became possible thanks to the coordinated work of government, business, and investors. This demonstrates that all conditions have been created in Tuva for the rapid and successful implementation of large-scale industrial initiatives.

VALENTIN KONOVALOV

Head of the Rebublic of Khakassia
Head of the Government of the Republic of Khakassia

As part of the development of the new economy in the Republic of Khakassia, special attention is paid to such sectors as construction, tourism, agriculture, manufacturing and light industry. The implementation of investment projects plays a significant role in our region, including those of Comprehensive Investment Project "Yenisey Siberia". Today, as a part of the CIP, Khakassia implements 11 initiatives to the amount of 293 billion rubles. These projects boost the investment activity in the key economic sectors of the region, enhance business relations between the territorial entities of the Siberian Federal District, create jobs in the Republic.

The Khakas Government together with the Yenisey Siberia Development Corporation, is working hard on the improvement of the investment climate in the region and on the development of the Republican industrial infrastructure. Today, we are working on the creation of territories with preferential treatments for enterprises, including a special economic zone "Khakas technological valley" that would be of benefit to all big investment projects and enhance the production sector.

Regional development institutions are highly important to regions. Experts of the Yenisey Siberia Development Corporation offer complex support to investors, its activities being one of the most important incentives to attract investments to the Republic's economy.

OLGA KOROSTELEVA

CEO of Yenisey Siberia Development Corporation

Yenisey Siberia encompasses three regions, stretching from the source to the mouth of the great Yenisey River. The lands of the Krasnoyarsk Region, Khakassia, and Tyva possess significant manufacturing, economic, and investment potential. The regions are rich in natural resources, have a well-developed transportation infrastructure, and are supported by a robust scientific and educational complex, all of which contribute to the development of diverse industries in Yenisey Siberia. Key sectors include mineral extraction and processing, metallurgy, machine engineering, tourism, agroindustrial complex, energy industry, and many more.

The implementation of investment projects promotes accelerated development in the regions: new jobs are created, tax revenues grow, the number of small and medium-sized enterprises increases, and scientific discoveries are made.

The Yenisey Siberia Development Corporation collaborates closely with the governments of the three regions to create favorable conditions for the realization of even the most ambitious initiatives. This collaborative effort contributes to economic growth and improves the residents' quality of life. We welcome new investors and are always ready to assist in the prompt implementation of projects in Yenisey Siberia.
